BURDEN REDUCTION SUMMARY

The Department of Labor's (DOL) mission is to foster and promote the welfare of job seekers, wage earners, and retirees of the United States by improving their working conditions, advancing their opportunities for profitable employment, protecting their retirement and health care benefits, helping employers find workers, strengthening free collective bargaining, and tracking changes in employment, prices and other national economic measurements. In carrying out this mission, the Department administers a variety of Federal Labor laws which guarantee workers' rights to safe and healthful working conditions; a minimum hourly wage and overtime pay; freedom from employment discrimination; unemployment insurance; and other income support. In administering these laws and related programs, the Department actively seeks to minimize the paperwork burden on the American public.

The Paperwork Reduction Act of 1995 (PRA95) set government wide burden hour reduction goals of 10% for Fiscal Year (FY) 1996 and FY 1997, and 5% for FY 1998 – FY 2001. The Department adopted these reduction goals and achieved the FY 1998 25% burden hour reduction benchmark.¹ These reductions came as a result of program changes (those changes as a result of deliberate Federal government action), and recognition of adjustments (those changes that are not a result of Federal government action, such as new estimates).

The Department achieved a 7.4% reduction in the burden hours for FY 2000. This reduction exceeded the 5% goal and brings the total burden reduction from FY 1995 through FY 2000 to 32%. The Department however, is currently projecting a 43.5 million-burden hour increase between FY 2000 and FY 2001 due primarily to planned OSHA regulations regarding ergonomics (36.5 million) and occupational exposure to tuberculosis (7 million).

The Department remains committed toward achieving these reduction goals and will continue to research and implement ways to reduce burden hours. In order to maintain progress, the Department of Labor continues to work toward the three established information collection budget strategic goals established in the 1998 ICB submission. Achievements for FY 2000 and those planned for FY 2001 are listed based on those goals.

¹ The Department has reduced the total number of burden hours from 266 million burden hours in FY 1995 to 199 million hours in FY 1998 .

BURDEN HOUR CHANGES
(Includes both adjustments and program changes)

Agency	FY 1999 Actual	FY 2000 5% Reduction Goal	FY 2000 Actual	FY 2001 Projected
ETA	1,202,091	1,141,986	1,211,603	2,389,709
PWBA	4,990,466	4,740,943	7,066,383	8,452,841
ESA	32,367,572	30,749,193	30,966,005	28,094,655
OSHA	146,727,215	139,390,854	131,435,546	176,229,264
MSHA	6,916,611	6,570,780	7,186,401	7,707,653
BLS	3,423,624	3,252,443	3,440,518	3,442,451
Other ²	326,360	310,042	283,459	313,006
Projected Totals	195,953,939	186,156,242	181,589,915	226,609,579

The Department burden hour reductions through FY 2000 have been achieved, through the use of electronic initiatives, analysis of the largest collections of information, and by keeping burden for new collections of information at a minimum.

² This total represents the sum of the Department's agencies with smaller burden hours. This includes the VETS, Women's Bureau and Departmental Management.

BURDEN REDUCTION INITIATIVES FOR FY 2000 AND FY 2001

GOAL 1: Increase and promote the use of emerging technology to further reduce the burden on the American public and better manage information collections.

FY 2000 Activities

Programs are using and expanding the use of technology as follows:

- The Department collects data for the Consumer Price Index (CPI) by visiting grocery stores, rental housing units, doctors' offices, and other retail establishments. A major program is underway to automate this personal-visit/telephone based data collection process, as part of the multi-year CPI Revision. Electronic collection technology is used to collect rent data for use in compilation of the CPI each month. Information for approximately 71,000 visits to rental housing units is collected each year using small, hand-held computers in the field. Computers also are used for screening and initiating rental housing units for the CPI Housing Survey. Data are transmitted electronically to and from the National Office. This technology will continue to evolve and be extended to other components of the CPI in the future.
- The rapid expansion of consumer purchases through the Internet presents both an opportunity and a challenge to the CPI outlet-sampling process. The outlet samples for most CPI item strata come from the sampling frames of the Point of Purchase Survey (POPS), in which a representative sample of households is asked about items they purchased. Starting in 2000, the Census Bureau administered the POPS, explicitly asking households whether the outlet was an Internet outlet. Over the four-year period of 2000 through 2003, virtually all CPI outlets will be replaced with new ones based on the POPS for 1998 through 2001. Since Internet outlets increased greatly starting in 1998, we expect that we will include a number of Internet outlets over this rotation period. We should start seeing them enter the index samples in 2001.
- Several reporting options help to reduce employer reporting burden. Computer listings are accepted in lieu of the Multiple Worksite Report (MWR) if this is more convenient for the employer. Magnetic media specifications have been developed so that the States can now accept an electronic submittal of MWR data directly from an employer. An Electronic Data Interchange (EDI) Collection Center has been established in Chicago, Illinois, that allows employers who complete the MWR for multi-State locations to submit employment and wage information on any electronic medium (tape, cartridge, diskette, computer-to-computer)

directly to the data collection center. The Center then forwards these data to the respective State agencies. EDI reporting has increased to 145 businesses representing over 3 million employees and 78 thousand locations. The Center also collects data from the Department of Defense, the National Finance Center, and the Army's Non-Appropriated Funded activities, which represent an additional 1 million employees at 14 thousand locations. The U.S. Postal Service has submitted test tapes containing data for approximately 25,000 locations and covering nearly one million employees. Other Federal agencies that may provide electronic submittals in the future include the Department of Health and Human Services, General Services Administration, and the Departments of the Interior and Transportation.

- The Current Employment Statistics (CES) uses Touchtone Data Entry (TDE) for nearly two-thirds of its sample which makes reporting easier for the respondent. In addition, CES provides reporting options using Computer Assisted Telephone Interviewing (CATI), Electronic Data Interchange (EDI), and fax. CES uses EDI to collect data from 30 large firms, representing 2.5 million employees and 23,000 establishments. EDI significantly reduces reporting burden for these large firms.
- The Job Openings and Labor Turnover Survey (JOLTS) will collect data using Computer Assisted Telephone Interview (CATI) for the first six months that a unit is in the sample. After six months, JOLTS will use TDE technology to collect data. Both methods allow the respondents to save time because they do not have to process and mail back a form. The initial six months' reporting via CATI is necessary to help the respondent understand the form and the data requested. Although an attempt is made to schedule CATI interviews at the respondent's convenience, TDE will allow respondents an even greater flexibility in responding at their most convenient time.
- OSHA continues to use information technology to reduce burden hours on the public, mainly through its Web page. The Web page enables employers to access materials more easily and less costly, better understand OSHA's regulatory requirements, and, in general, improve their knowledge base thus improving the safety and health of the work environment they provide to their workers. The Web page makes frequently filed forms such as the OSHA 101 - "Supplementary Record of Occupational Injuries and Illnesses" and the OSHA 200 - "Log and Summary of Occupational Injuries and Illnesses" available to the public. During FY 2000, OSHA unveiled the "Workers Page." The Workers Page gives employees an electronic option for filing formal complaints about unsafe working conditions. Previously, employees had to either call or write OSHA when alleging workplace hazards. In addition, this site provides electronic links to other sources of information about occupational safety and health.
- The Web page also has "Expert Advisors" available that allow full privacy to the user because they are easily downloadable. The OSHA Interactive Safety and Health Expert Advisors are a suite of intelligent software that help employers and workers recognize hazards and

determine what protective measures OSHA requires for their work. The Expert Advisors use a diagnostic approach to ask the user a series of questions and follow-up questions to determine whether, how, and which specific parts of a standard apply to the user's activities. Based on the answers that the user gives, the Advisor determines what information the user needs to know about the standard's application. This process helps the user through a complex standard where the application of the standards is based on "decision tree" thinking.

- OSHA finalized the SafeCare Advisor for long-term health care facilities and placed public test versions of the Lockout/Tagout Advisor, the Respirator Advisor, and the Lead in General Industry Advisor on the Web. In addition, "online" versions of the Confined Spaces Advisor and the Fire Safety Advisor, which allow users to run the systems through the Web, without downloading them. (They are still software, they just look like Web sites.)
- The Department significantly increased the timeliness, accuracy, and general usefulness of DOL regulations, guidelines, and assistance materials on the Internet. The number of documents available to the public on the DOL web site grew 50%, increasing from 100,000 to 150,000 documents.
- The Department will continue forms automation, including electronic signatures. For example, in FY 2000 the Federal Employees Compensation (FECA) program implemented a state-of-the-art system for online acceptance of pharmacy bills. Inpatient hospital bills were partially automated in FECA in FY 1999 and will be expanded through FY 2001. The Black Lung program is currently receiving pharmacy bills in electronic format. The Longshore program's automation of Special Fund reporting and verification Forms 274 and 513 will be included as part of the GPEA initiative. In FY 2001, the Employment Standards Administration, as an Agency, with the assistance of input from its programs, will plan and develop infrastructure requirements and other software needs related to GPEA compliance.

FY 2001 Activities

- OSHA anticipates releasing a Hazard Communication Advisor and additional Advisors focused on specific industry problems. The number of downloads increased by approximately 50% over FY 1999.

GOAL 2: Clarify/Streamline collections of information to reduce respondent completion time.

FY 2000 Activities

- The Department, Internal Revenue Service, and the Pension Benefits Guaranty Corporation have together conducted an extensive review of the Form 5500 and instructions in order to streamline and simplify the form, eliminate unnecessary elements, and addressing elements known to generate confusion or errors. The review was intended to reduce reporting burden for employee benefit plans, and support the implementation of a new and more efficient processing system for the more than 1 million returns filed annually. The agencies also conducted an extensive study of the methodology for estimating the burden associated with the form in order to establish an appropriate baseline against which to measure any reduction in burden resulting from their streamlining efforts.
- The BLS continues to work closely with several service bureaus that prepare employers' payroll and tax reports to request the submittal of the MWR data in an electronic medium directly to the BLS as a new service for their clients. Likewise, the BLS has been working closely with payroll/tax software developers to include in their systems the capability for electronic submittal of the MWR data directly to the BLS. To date, one service bureau and seven payroll/tax software developers have designed their systems to include this feature. During the next year, we expect two or three additional payroll service bureaus and one additional payroll/tax software developer to add the electronic reporting to their systems. This approach will increase significantly the number of employers using an electronic medium to submit the data since each employer will not need to invest its own staff resources in the development and set-up of the new procedures. Either the service bureau or the software developer will provide this service.
- The International Price Program (IPP) has adopted company-level burden caps for establishments that appear frequently in the IPP surveys. The BLS currently is involved in developing caps for individual product or service groupings sampled for particular companies to further reduce reporting burden. To minimize the number of contacts with IPP reporters, BLS field agents are permitted to combine the collection of assigned data for companies that are likely to appear in consecutive IPP samples. Since the same field agents who collect IPP data also collect data for the Producer Price Index (PPI), they are allowed to combine collections of IPP and PPI data when it is possible to do so. For some time, we also have been using data for individual items in both the IPP and the PPI in certain establishments and industries. The IPP and PPI use this burden-reducing mechanism only in cases that will not degrade the quality of the indexes produced by the programs. To reduce monthly reporting burden, the IPP is allowing the expanded use of "off-cycle repricing" (the collection of prices at intervals less frequently than monthly), especially in cases when respondents request it or when item prices are set at particular times during the year and do not change in the interim. In a future IPP project, the BLS will examine whether it is possible to reduce the frequency of

GOAL 3: Identify regulatory initiatives to modify or eliminate existing collections of information.

sampling for certain classes of items, such as those with very stable physical characteristics. Finally, the IPP is in the preliminary stages of an Internet collection project to expand the reporting options of monthly respondents. The program also is redesigning the collection form to further simplify reporting.

- Recent modifications made to Producer Price Index (PPI) publication-goal strategies resulted in a 20 percent reduction in sample allocation per industry. Since PPI resamples roughly 13.3 percent of mining and manufacturing sector industries annually, this change will result in approximately a 3 percent reduction in overall mining and manufacturing respondent burden as PPI implements this change over the next seven and one-half years. Sample re-allocation to the non-goods producing sector of the economy (i.e., services), in combination with a one-time increase to 390,684 respondent burden hours per year, permits PPI to fulfill its publication mandate to provide price indexes for every U.S. industry.

FY 2001 Activities

- For the 2000 survey (FY 2001), the Occupational Employment Statistics (OES) Program is collecting occupational counts and wage data by a mail questionnaire sent to employers by State Employment Security Agencies (SEAS). To reduce employer burden, three different forms are used – long, short, and unstructured. Furthermore, we provide employers forms tailored to their industries. As a result, 3,400 pages of OES forms are used for the 2000 survey. Also, current survey respondents can supply OES data by telephone, electronic tape or diskette, or computer-generated listings.
- The DOL web site now has 23 Elaws; eight were added in FY 2000 and ten new systems will be added in FY 2001.

FY 2000 Activities

- OSHA participated in an Office of Management and Budget (OMB) sponsored initiative on

paperwork reduction by chairing a roundtable discussion on “Certifying Regulatory Compliance.” Over 30 participants from labor, industry, and government discussed ways to reduce or eliminate unnecessary paperwork and associated requirements. As a result of this discussion, OSHA will use the Agency’s Advisory Committees to review existing Information Collection Requests to identify paperwork requirements that need modification or can be deleted without reducing employee safety and health. The Agency also plans to publish a Notice of Proposed Rulemaking, “Standards Improvement Project—Phase II,” that will remove and revise standard provisions that are out of date, duplicated, unnecessary, and inconsistent. Finally, OSHA will continue to develop expert advisors and expert systems to assist the public in understanding and complying with OSHA Standards. While these activities will not negate the projected burden hour increase, they establish important groundwork to identify unnecessary paperwork requirements and means to remove such requirements.

- PWBA published a proposed regulation concerning the use of electronic technologies for disclosures under ERISA, which clarifies the circumstances under which disclosures made through electronic media are considered to satisfy existing disclosure requirements. Burden reductions reflect savings that plan administrators may achieve by distributing information electronically.

FY 2001 Activities

- OSHA began drafting the Standards Improvement -- Phase II Notice of Proposed Rulemaking (NPRM) during FY 2000 and anticipates publication of the NPRM in FY 2001. The NPRM will propose to remove and revise standard provisions that are out of date, duplicative, unnecessary, and inconsistent. These changes will further reduce the burden imposed on the regulated community. Most of the burden hour and cost reductions will occur in OSHA’s health standards; approximately 13 health standards will be impacted. However, not all health standard revisions will result in burden hour reductions. For example, OSHA is proposing to standardize how soon employers must provide employees with their exposure-monitoring results. Such standardization clearly makes it easier for employers to comply with such requirements but may not reduce burden hours. OSHA also will publish a Final Recordkeeping standard in FY 2001. However, any change in burden hours will occur in FY 2002 since employers will begin using the new forms at that time.
- In contract compliance, the Department revised and restructured 41 CFR 60-2, its Affirmative Action Programs’ regulations pertaining to supply and service contractors (OMB 1215-0072). Under proposed regulations, significant reductions in recordkeeping burden hours are expected, by revising current methods and procedures used in the development and implementation of an Affirmative Action Program (AAP), and proposing a simplified AAP

for small contractors. As a result of the revisions in the affirmative action process, the total time expected to accomplish certain components, i.e., AAP development, annual updating, and maintenance of the AAP was reduced by 2.8 million hours.

X

SECTION A

EXAMPLES OF SIGNIFICANT BURDEN CHANGES

FY 2000

Reductions

Changing Regulations None

Cutting Redundancy None

Changing Forms

OMB#s: 1210-0016 and 1210-0110

Title: Form 5500 -- Annual Report/Return of Employee Benefit Plan

Purpose of the Collection: Under Title I of ERISA, Title IV of ERISA, and the Internal Revenue Code of 1986, as amended, administrators of pension and welfare benefit plans, as well as employers sponsoring fringe benefit plans and other plans of deferred compensation, are required to file returns/reports annually concerning the financial conditions and operations of the plans. These reporting requirements are satisfied generally by filing the Form 5500. The Form 5500 serves as a disclosure document for plan participants, as well as the principal source of information and data available to the Department of Labor, Internal Revenue Service, and Pension Benefit Guaranty Corporation in their enforcement, research, and policy formulation programs. The Form 5500 is also the primary source of data on employee benefit plans for federal agencies, Congress, and the private sector.

How Reduction Achieved: The Department, IRS, and PBGC have together conducted an extensive review of the form and instructions for the purpose of streamlining and simplifying the form, eliminating unnecessary elements, and addressing elements known to generate confusion or errors. The review was intended to reduce reporting burden for employee benefit plans, and support the implementation of a new and more efficient processing system for the more than 1,000,000

returns filed annually. The agencies also conducted an extensive study of the methodology for estimating the burden associated with the form in order to establish an appropriate baseline against which to measure any reduction in burden resulting from their streamlining efforts. The net program change shown results from the net effect of the expiration of the form used prior to its revision (for 1998 and earlier plan years), and the implementation of the new Form 5500 for 1999.

Change in Burden: Hours = (313,850)
Costs = (\$40,540,000)
Reductions of 2,131,261 hours and \$557,907,000 for expiration of 1210-0016, plus increases of 1,817,411 hours and \$517,367,000 for implementation of the new form (1210-0110)

Using Information Technology

OMB#: 1210-0039

Title: Summary Plan Description Requirements under ERISA

Purpose of the Collection: Statutory provisions and related regulations provide plan administrators with guidance on information required to be furnished to participants and beneficiaries of employee benefit plans so that they may be informed about the provisions of the plan and protected in their rights under the plan.

How Reduction Achieved: On January 28, 1999, PWBA published a proposed regulation (64 FR 4506) concerning the use of electronic technologies for disclosures under ERISA which clarifies the circumstances under which disclosures made through electronic media are considered to satisfy existing disclosure requirements. Burden reductions reflect savings plan administrators may achieve by distributing information electronically.

Change in Burden: Hours = (170,516)
Costs = (\$3,039,000)
The 170,516 hour reduction was categorized in OMB inventory as an adjustment, but should have been shown as a program change. The Department requested a correction in inventory figures to

reflect this program change. The cost change was appropriately characterized.

Statutory Reductions None

Other

OMB #: 1219-0037

Title: Noise Data Report Form and Calibration Records
(MSHA Form 2000-168)

Purpose of the Collection: Require underground and surface coal mine operators to conduct initial, periodic, and supplemental noise exposure surveys; conduct noise level measurements; and report and certify to MSHA the environmental noise levels to which miners are exposed.

How Reduction Achieved: Removed from inventory and made part of the final rule on Noise (1219-0120) which removed MSHA Form 2000-168.

Change in Burden: Hours = (67,798)

OMB #: 1220-0164

Title: National Compensation Survey

Purpose of the Collection: Survey of employee salaries, wages, and benefits. (The NCS replaces three existing BLS surveys: Employment Cost Index (ECI), Occupational Compensation Survey Program (OCSP), and Employee Benefits Survey (EBS).)

How Reduction Achieved: Three year average; there is no SCA funding for Fiscal Year 2000.

Change in Burden: Hours = (15,161)

FY 2000

Increases

Statutory Increases

OMB#:	1210-0113
Title:	National Medical Support Notice — Part B
Purpose of the Collection:	The Child Support Performance and Incentive Act of 1998 mandated the promulgation of regulations by the Department of Labor (PWBA) and the Department of Health and Human Services to establish a model qualified medical support order for use by State child support agencies and private employer-sponsored health plans to facilitate the enrollment of children in health care coverage.
Why Increase Occurred:	The Departments published a proposed model notice that is intended to simplify and standardize communications among States, parents, and group health plans under ERISA and create a uniform form for the enforcement of child medical support orders (64 FR 62054, November 15, 1999). OMB approved the proposed model notice in accordance with the provisions of the Paperwork Reduction Act of 1995. It is anticipated that the final notice will be published in FY 2001.
Change in Burden:	Hours = 785,000 Costs = \$1,100,000
Statute Title and P.L. #:	<u>Child Support Performance and Incentive Act of 1998</u> (Pub. L. 105-200).
OMB#:	1210-0114
Title:	Disclosures to Policyholders of Insurance Company General Accounts Which Include Employee Benefit Plan Assets

Purpose of the Collection: Section 1460 of the Small Business Job Protection Act of 1996 (Pub. L. 104-188) (SBJPA) amended ERISA by adding a new Section 401(c), which clarified the application of ERISA to insurance company general accounts. New Section 401(c) required that certain steps be taken by insurance companies which offer and maintain policies for private sector employee benefit plans where the assets are held in the insurer's general account. The statute required the Department to draft regulations subject to a number of special requirements intended to safeguard the interests of both pension and welfare benefit plans that hold insurance company general accounts. Pursuant to the authority given to the Secretary under the statute, the regulation requires that certain disclosures be provided to policyholders at the outset of the contract and annually, and that other disclosures be provided upon request.

Why Increase Occurred: The final regulation implementing disclosure requirements for insurance company general accounts that include employee benefit plan assets was published by PWBA on January 5, 2000 (65 FR 614).

Change in Burden: Hours = 1,204,369
Costs = \$30,000.

Statute Title and P.L.#: Small Business Job Protection Act of 1996 (Pub. L. 104-188).

Other

OMB#: 1210-0040

Title: ERISA Summary Annual Report Requirement

Purpose of the Collection: On December 1, 1999, PWBA published a notice of proposed rulemaking (64 FR 67436) that would amend ERISA's reporting and disclosure requirements to address a potential vulnerability of small pension plans to fraud and abuse by professional asset managers. The proposal, which would amend the ERISA Summary Annual Report regulation, is intended to enhance the level of security and accountability for small pension plan assets while keeping administrative burdens and costs to a minimum by building on current recordkeeping, disclosure, and bonding

requirements. OMB approved the revised disclosure requirements following publication of the proposal.

Why Increase Occurred: The information collection provisions of the regulation require that in order for a pension plan with fewer than 100 participants to qualify for an exemption from the requirement to engage an independent accountant, participants must be provided with enhanced information under certain circumstances when plan assets are held by entities other than specific financial institutions.

Change in Burden: Hours = 20,595
Costs = \$2,682,000

OMB#: 1210-0115

Title: Proposed Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds

Purpose of the Collection: On December 15, 1999, PWBA published a notice of pendency of a proposed class exemption from prohibited transaction restrictions of ERISA, and taxes imposed by the Internal Revenue Code of 1986 (64 FR 70057). The proposed exemption would under certain conditions permit cross-trades of securities between Index and Model-Driven Funds managed by investment managers and between such Funds and certain large accounts in connection with a specific portfolio restructuring program.

Why Increase Occurred: The information collection provisions of the proposed class exemption are designed to ensure prior approval by plans, proper disclosures to investors concerning cross-trading programs, and fair pricing procedures. The information collection requirements incorporated within the proposed class exemption were approved by OMB in accordance with the Paperwork Reduction Act of 1995.

Change in Burden: Hours = 68,150
Costs = \$116,000.

OMB#: 1210-0117

Title: Application for EFAST Electronic Signature and Codes for EFAST Transmitters and Software Developers

Purpose of the Collection: ERISA requires that the administrators of employee benefit plans, and employers sponsoring certain fringe benefit plans and other plans of deferred compensation, file returns/reports annually concerning the financial condition and operation of the plans. Reporting requirements are satisfied by filing the Form 5500 Series in accordance with its instructions and the related regulations. Form 5500 filings for plan years which begin in 1999 will be processed under a new system, the ERISA Filing Acceptance System, or "EFAST," which is designed to simplify and expedite the receipt and processing of the Form 5500 Series by relying on computer scannable forms and electronic filing technologies. In order to file electronically, employee benefit plan administrators, Form 5500 Series transmitters, and entities developing software to complete and/or transmit the Form 5500 Series must submit an Application for EFAST Electronic Signature and Codes for EFAST Transmitters and Software Developers (Form EFAST-1) to PWBA.

Why Increase Occurred: EFAST-1 is the vehicle by which administrators' and transmitters' signatures and declarations are transmitted to the Department so they can be provided with secure codes for the filing and transmission of the Form 5500 Series. The electronic signatures and other codes provide future verification of a filer's standing as a qualified participant in the electronic filing program, and a means of contact for information exchange and publication distribution between the filer, transmitter, or software developer and the Department.

Change in Burden: Hours = 80,083
Costs = \$91,000

OMB #: 1215-0196

Title: Equal Opportunity Survey

Purpose of the Collection:	To provide Government contractors an opportunity to report the results of their affirmative efforts to employ and promote minorities and women in their workforce and provide them a tool for self-analysis.
Why Increase Occurred:	New collection.
Change in Burden:	Hours = 84,000
OMB #:	1219-0120
Title:	Noise Exposure Assessment; Audiometric Testing Evaluation and Records and Training in all Mines
Purpose of the Collection:	Records of miner exposures are necessary so that mine operators and MSHA can evaluate the need for and effectiveness of engineering controls, administrative controls, and personal protective equipment to protect miners from harmful levels of exposure. To require mine operators to establish an electrical maintenance program by specifying minimum requirements for the examination, testing, and maintenance of electric equipment.
Why Increase Occurred:	Although this final rule was approved for 123,099 burden hours there is net increase of 42,657 burden hours. This final rule included the burden hours from three previously approved packages, 1219-0017, 1219-0037, and 1219-0122.
Change in Burden:	Hours = 123,099 (123,099 minus 80,442) 5,280 hours from 1219-0017 and 67,798 from 1219-0037. 7,364 hours from 1219-0122 (officially removed from inventory October 3, 2000) equaled a net increase of 42,657 hours
OMB #:	1219-0131
Title:	Training Plans, New Miner Training, Newly-hired Experienced Miner Training

Purpose of the Collection:	Requires mine operators to develop and implement a written training plan, provide training, record and certify training and maintain training certificates for miners trained in health and safety.
Why Increase Occurred:	This final rule amended MSHA's existing health and safety training regulations (30m CFR Part 48), establishing new training requirements in Part 46, to ensure that all miners receive the required training, which would result in a decrease in accidents, injuries, and fatalities.
Change in Burden:	Hours = 253,393 Costs = \$604

OMB #:	1215-0072
Title:	OFCCP Recordkeeping and Reporting Requirements: Supply and Service
Purpose of the Collection:	Enforcement of Federal contractor's equal opportunity and nondiscrimination contractual obligations
How Reduction Achieved:	Simplifying and reducing regulatory requirements.
Change in Burden:	Hours = (2,835,510)
OMB #:	1215-0013
Title:	Applications to Employ Homeworkers, Piece Rate Measurement, Homeworker Handbooks WH-46 Application for Certificate to Employ Homeworkers WH-75 Homeworker Handbook
Purpose of the Collection:	These reporting and recordkeeping requirements for employers and employees in industries employing homeworkers are necessary to insure employees are paid in accordance with the Fair Labor Standards Act.
How Reduction Achieved:	Through rulemaking, the Department of Labor intends to reduce reporting and recordkeeping burden on employers and employees in unrestricted industries using homeworkers.
Change in Burden:	Hours = Over (26,000) when rulemaking becomes final.
Cutting Redundancy	None

Changing Forms None

Using Information Technology - None

Statutory Reductions

OMB#: 1210-0114

Title: Disclosures to Policyholders of Insurance Company General Accounts Which Include Employee Benefit Plan Assets

Purpose of the Collection: Section 1460 of the Small Business Job Protection Act of 1996 (Pub. L. 104-188) (SBJPA) amended ERISA by adding a new Section 401(c), which clarified the application of ERISA to insurance company general accounts. New Section 401(c) required that certain steps be taken by insurance companies which offer and maintain policies for private sector employee benefit plans where the assets are held in the insurer's general account. The statute required the Department to draft regulations subject to a number of special requirements intended to safeguard the interests of both pension and welfare benefit plans that hold insurance company general accounts. Pursuant to the authority given to the Secretary under the statute, the regulation requires that certain disclosures be provided at the outset of the contract and annually, and that other disclosures be provided upon request.

How Reduction Achieved: The information collection was implemented in FY 2000 and burden estimates included both start up and continuing costs. By FY 2001, the start-up costs associated with initial disclosures to policyholders will have been fully defrayed. The remaining burden is the ongoing cost of the disclosure provisions of the regulation.

Change in Burden: Hours = (737,702)
 Costs = No change

Statute Title and P.L.#: Small Business Job Protection Act of 1996 (Pub. L. 104-188)

Other

OMB #: 1220-0032

Title: Annual Refiling Survey

Purpose of the Collection: To verify the accuracy of industry codes for business establishments covered by State Unemployment Insurance (U.I.) programs.

How Reduction Achieved: Fewer industries will be surveyed in Fiscal Year 2001 and the 3023-NAX survey is not expected to be undertaken.

Change in Burden: Hours = (60,299)

FY 2001

Increases

Statutory Increases

OMB#: 1210-0NEW

Title: Disclosures to Participants and Beneficiaries of ERISA Group Health Plans under the Women's Health and Cancer Rights Act (WHCRA)

Purpose of the Collection: Under WHCRA, group health plans and health insurance issuers must generally provide coverage for reconstructive surgery if an individual who is receiving benefits in connection with a mastectomy elects breast reconstruction. WHCRA includes notice and disclosure provisions, which are expected to be implemented during FY 2001 by regulations published jointly by the Departments of Labor and Health and Human Services. The notice and disclosure provisions are intended to make plan participants aware of the new protections for mastectomy patients.

Why Increase Occurred: The regulation will include information collection provisions consistent with the statute.

Change in Burden: Hours = 355,588
Costs = \$4,545,000.

Statute Title and P. L. #: Women's Health and Cancer Right Act of 1998 (Pub. L. 105-277).

Other

OMB#: 1205-0NEW

Title: O*NET Data Collection Program

Purpose of the Collection: The O*NET Data Collection Program is a new survey that will begin in February/March 2001. It is planned as a continuing

activity. The purpose of the survey is to maintain a current database on the detailed characteristics of occupations. Over 200 occupational specific attributes for 974 occupations as well as thousands of task statements will be updated over the three years. In 2001, information will be collected for about 300 occupations. While this survey is new, a number of steps were taken to reduce the anticipated burden based on the experience of a pretest survey in 1999/2000. The number of questionnaires were reduced from 5 to 4, a 20% reduction in what the burden would have been.

Why Increase Occurred:	New Collection
Change in Burden:	Hours = 23,305
OMB#:	1210-0039
Title:	Summary Plan Description under ERISA
Purpose of the Collection:	Statutory provisions and related regulations provide plan administrators with guidance on information required to be furnished to participants and beneficiaries of employee benefit plans so that they may be informed about the provisions of the plan and protected in their rights under the plan.
Why Increase Occurred:	In November of 1997, the President's Advisory Commission on Consumer Protection and Quality in the Health Care Industry issued its report and recommendations entitled "Consumer Bill of Rights and Responsibilities" to the President. In February of 1998 the President directed the Secretary of Labor to implement those recommendations which fell within the Department's regulatory authority. Accordingly, on September 9, 1998 (63 FR 48372), PWBA published a proposal which would implement the Commission's information disclosure recommendations by amending the existing regulation concerning the required contents of Summary Plan Descriptions under ERISA. Final rules are expected to be published in FY2001.
Change in Burden:	Hours = 1,017,280 Costs = \$79,731

OMB#: 1210-0053

Title: ERISA Claims Procedure

Purpose of the Collection: ERISA requires employee benefit plans, including group health plans covered by ERISA, to establish reasonable claim procedures. Regulations provide guidance to plan administrators concerning what constitutes a reasonable claim procedure so that administrators may know what constitutes compliance, and claimants will know how to claim their benefits and pursue their claims in the event of a claim denial.

Why Increase Occurred: In November of 1997, the President's Advisory Commission on Consumer Protection and Quality in the Health Care Industry issued its report and recommendations entitled "Consumer Bill of Rights and Responsibilities" to the President. In February of 1998 the President directed the Secretary of Labor to implement those recommendations which fell within the Department's regulatory authority. Accordingly, on September 9, 1998 PWBA issued a proposal which would amend the existing employee benefit plan claims procedure rules to strengthen the internal appeals process for all ERISA health plans, and to take into account the dramatic changes which have occurred in the delivery of health care. Final rules are expected to be published in FY 2001.

Change in Burdens: Hours = 226,000
Costs = \$35,000,000

OMB#: 1215-0194

Title: The NCPDP Universal Pharmacy Billing Form (Form 79-1A)

Purpose of the Collection: The NCPDP is the standard billing form used by pharmacies throughout the country to request reimbursement for prescription drugs. It is used by the Office of Workers' Compensation Programs to process pharmaceutical bills for FECA and Black

Lung beneficiaries.

Why Increase Occurred: The number of burden hours for the form is reported as a program increase because bills formerly submitted on nonstandard formats are now on a standard format. Although the number of burden hours for this form has increased, the submittal of prescription drug bills on nonconforming formats has essentially been eliminated. Standardizing the bill format has enabled OWCP to accept electronic billings from pharmacies, allowed for implementation of a cost saving prescription drug maxima allowable schedule, and provided the elements necessary to automate review of the drug's relatedness to the injured worker's accepted condition.

Change in Burden: Hours = 15,668

OMB #: 1218-0241

Title: Steel Erection

Purpose of the Collection: To protect workers involved with steel erection.

Why Increase Occurred: Increase occurred as a result of a final rule on Steel Erection

Change in Burden: Hours = 35,127

OMB #: 1218-0NEW

Title: Ergonomics Program

Purpose of the Collection: To address the significant risk of work-related musculoskeletal disorders in various jobs in general industry workplaces.

Why Increase Occurred: The increase will occur as the result of publishing a final rule on Ergonomics. OSHA's final ergonomics program standard will significantly reduce the number and severity of work-related musculoskeletal disorders (MSDs) caused by exposure to risk factors in the workplace. Each year 1.8 million workers in the United States report work-related MSDs such as carpal tunnel

syndrome, tendentious and back injuries. About 600,000 MSDs are serious enough to result in workers having to take time off work to recover. The solution to these injuries lies with ergonomics, the science of fitting the job to the worker.

OSHA estimates that 4.6 million MSDs will be prevented in the first ten year. The Standard will cover 102 million workers at 6.1 million worksites.

Change in Burden: Hours = 36,553,382
Cost = \$61,113,780
The costs reflect an employer paying for an employee to visit a health care professional. The Agency estimates there will be 470,106 HCP visits, each costing \$130.

OMB #: 1218-ONEW
Title: Occupational Exposure to Tuberculosis
Purpose of the Collection: To prevent or minimize occupational exposure to Tuberculosis.

Why Increase Occurred: The increase will occur as the result of publishing a final rule on Tuberculosis.

Change in Burden: Hours = 7,098,011
Costs = \$92,088,356

OMB #: 1219-0088
Title: Verification of Underground Coal Mine Operators' Dust Control Plans and Compliance Sampling for Respirable Dust (Plan Verification)
Purpose of the Collection: Requires that additional records be kept concerning the ventilation system, tests and examinations which are required. The information is used to ensure that the integrity of the ventilation system is being maintained and that a safe working environment is being provided to miners.

Why Increase Occurred: This proposed rule will result in an increase in burden hours and a decrease in burden costs as indicated below. These changes will be reflected in revisions to MSHA's existing package 1219-0088.

Change in Burden:	Existing Package:	\$194
	<u>2,723,592</u>	
	Proposed Rule:	\$117
	<u>2,737,980</u>	
	4,388 Hours	\$ -77 Costs

OMB #: 1219-0NEW

Title: Hazard Communication

Purpose of the Collection: Require mine operators to use labels or other forms of warning necessary to inform miners of all hazards to which they are exposed, relevant symptoms and emergency treatment, and proper conditions of safety use or exposure.

Why Increase Occurred:

Change in Burden:
Hours = 511,721
Costs = \$1,235

OMB #: 1220-0011

Title: Current Employment Statistics

Purpose of the Collection: Provides data necessary to produce estimates on employment, average wages, and hours worked, by area and by industry.

Why Increase Occurred: The increase is due to the solicitation for the redesign.

Change in Burden: Hours = 25,190

SECTION B
DESCRIPTION OF FY 2000 VIOLATIONS

TABLE I -- VIOLATIONS DUE TO ACCIDENTAL EXPIRATION:

OMB Control Number	Title	Date of Expiration	Date of Reinstatement	Date Discontinued
1219-0037	Noise Data Report Form and Calibration Record	09/1998	10/04/1999	
1219-0073	Record of Mine Closures, Opening and Reopening of Mines	08/1998	10/18/1999	

TABLE II - A - ALL OTHER: FY 1999 RESOLVED VIOLATIONS

OMB Control Number	Collection Title	Description of Violation	How Discovered and How Remedied
1205-0015	Application for Alien Employment Certification	Since January/February 1999, the office was under serious pressure to accomplish two major goals: to serve as a third (backup) site for the LCA fax system so that ETA would process H-1B applications within the legally mandated 7 day time limit and to work closely with the regions to reduce the permanent case backlog in half by July. The system accomplished both of these goals, but only by the two staff people available in the office directing virtually their full time on those efforts. A new staff person was scheduled to be on board in mid September, so, even in times of "crisis" like early this year, ETA will have the capability to respond to the needs of paperwork reduction in a timely manner in the future.	ETA staff – Approved by OMB December 2, 1999.
1205-0025	Job Corp Data Sheet	Job Corp policy and requirements underwent extensive changes affecting the eligibility policy and application process and, finally, the WLA was passed into law, bringing further changes in policy affecting this form.	ETA staff -- Approved by OMB September 12, 2000.
1205-0026	Job Corp Statement from the Court	See explanation for 1205-0025.	This ICR subsumed all of 1205-0031 and 1205-0026 and ETA 682 from 1205-0033.
1205-0031	Job Corp Request for Readmission	See explanation for 1205-0025.	ETA staff -- Consolidated with 1205-0025.
1205-0040	Senior Community Employment	The OMB approval for the Senior Community Service Employment program was allowed to expire due to a number of uncertainties connected with the authorizing legislation. The need for addressing performance indicators required new kinds of data	ETA staff -- Consolidated with 1205-0025.
1205-0134	Forms for Agricultural recruitment System of Services to Migratory Workers and Their Employers Application for Alien Employment Certification	Because the migrant and seasonal farmworker program was staffed by only one individual, the Monitor Advocate, it was almost impossible for the monitor advocate to perform the enormous paperwork involved in running the program along with the many required site visits that must take place during the year. The Monitor Advocate was out of the office 80% of the time.	ETA staff -- Approved by OMB December 10, 1999.

OMB Control Number	Collection Title	Description of Violation	How Discovered and How Remedied
1205-0219	JC Standard RFP Information Gathering	Due to a rewrite of the Job Corps Policy Requirements Handbook (PRH). It was thought that the rewrite may have an impact on the reporting burden requirements. However, as soon as it became apparent that the PRH would not be implemented as quickly as originally planned, the paperwork requirements were published in the Federal Register. In addition, during the resolution period, the JC staff person was out for sometime on family medical leave and was subsequently transferred to another office, thereby contributing to the delay.	ETA staff – Approved by OMB April 3, 2000.
1205-0243	JTPA SDA Reorganization Plan Appeal		Will not be reinstated
1205-0310	Labor Condition Application and Requirements for Employers Using Non-immigrants on H-1B visas in Specialty Occupations and as Fashion Models	The American Competitiveness and Workforce Improvement Act of 1999, enacted as part of the omnibus budget for FY 1999, substantially revised the H-1B program by increasing the annual cap on the number of H-1B foreign workers. The Department published a proposed rule to implement the statutory changes on 1/5/99, with a request for public comment on the regulations and on the Paperwork Reduction Act provisions. On 6/30/99, OMB approval of the ICR on the labor condition application expired. ETA did not submit a request to extend because it appeared at that time that the clearance and publication of a final or interim final rule to implement the statutory changes were imminent.	ETA staff – Existing collection approved by OMB April 24, 2000. ETA will revise the collection when the final rule is issued.
1205-0385	Welfare to Work Formula/Competitive Cumulative Quarterly Status Report	Error delayed publication of the Federal Register notice	ETA staff – Approved by OMB August 16, 2000.

TABLE II – B - ALL OTHER: FY 1999 UNRESOLVED VIOLATIONS

OMB Control Number	Collection Title	Description of Violation	How Discovered and How Remedied
1205-0035	Job Corp Placement and Assistance	Unapproved collection	The ICR is at OMB
1205-0398	WIA Planning Guidance	Change to the collection to cover modifications to the 5-Year plan	ETA staff -- 60 day public comment Federal Register published 11/02/00
1218-ONew	State Programs	Collection of Information in effect without OMB control number	Discovered by OSHA. As the Court challenge which delayed the submission of the ICR package on State paperwork associated with seeking and maintaining OSHA-approved State Plans was resolved in July 2000, OSHA is proceeding to develop an ICR package for the current regulations. Anticipated submission to OMB is early 2001.

		Documents to the Secretary on Request Under ERISA Section 104(a)(6); Assessment of Civil Penalties Under ERISA Section 502(c)(6)	Description and other documents submitted upon request	of employee benefit plans					
DOL	PWBA	Annual Report for Multiple Employer Welfare Arrangements (MEWAs) and Certain Entities Claiming Exception	Form M-1	MEWAs and certain group health plans	2678	1210-0116	Oct-03	See entry for 1210-0060 above.	No
DOL	PWBA	Application for EFAST Electronic Signature and Codes for EFAST Transmitters and Software Developers	EFAST-I	Administrators of employee benefit plans; Form 5500 transmitters and software developers	240250	1210-0117	Unknown	Form EFAST-I was designed purposefully as a paper-based form because of its use as the basis for issuing personal identification numbers (PINs) to authenticate Form 5500 electronic filings. As long as Form 5500 electronic filings rely on PINs or other "shared secret techniques" for authentication, Form EFAST-I will need to be paper based. However, in coordination with the IRS, we will continue to assess the possible use of other authentication methods, such as cryptographically-based digital signatures utilizing third party issuers of digital signature certificates, which might eliminate the need for the form or allow for a "fully electronic" EFAST-I.	No
DOL	PWBA	Voluntary Fiduciary Correction Program	Documentation of correction	Officials of employee benefit plans	700	1210-0118	Oct-03	See entry for 1210-0060 above.	No
DOL	PWBA	Definition of Collective Bargaining Agreement	Application for finding by Office of Administrative Law Judges	Administrators of employee benefit plans	45	1210-NEW	Oct-03	See entry for 1210-0060 above.	No
